

PROFESSIONAL SUMMARY

Results-driven Full Stack Engineer with 2+ years of professional experience designing and delivering scalable enterprise solutions that reduce operational costs and ensure business continuity. Expertise in end-to-end development, process automation, and API security architecture. Adept at translating complex technical requirements into high-performance, maintainable software. Proven track record of leading cross-functional collaborations and delivering measurable improvements in production environments.

WORK EXPERIENCE

Media Revolution	On-site
Full Stack Developer	2026-2026
- Architected and implemented the project's complete UI system, establishing component patterns and visual standards that reduced front-end inconsistencies by 60% across the team. - Led front-end development of a Telegram mini app for financial services, enabling seamless fund transfer and receipt flows for 500+ end users. - Designed and implemented the integration layer between the front-end and digital wallet services (crypto and fiat), defining API contracts with the back-end team and cutting integration time by 30%.	

Precisa Group SRL	Hybrid
Full Stack Developer	2024 - 2026
- Designed and developed the KYC system end-to-end, achieving a 40% improvement in identity validation efficiency and streamlining legal-labor background analysis. - Identified and implemented automation solutions for 3+ repetitive operational processes, reducing execution times by more than 50% and standardizing critical business workflows. - Defined API security standards, authentication, granular access control, and data validation, guaranteeing high availability, scalability, and zero reported security incidents throughout the production lifecycle.	

Banco BHD	On-site
Software Development Intern	Sept 2023 – Dic 2023
- Completed hands-on training in Pega platform, gaining foundational knowledge in enterprise low-code development within a high-scale banking environment. - Participated actively in Scrum ceremonies, sprint planning, daily stand-ups, and retrospectives, developing a strong understanding of Agile workflows in a professional financial institution. - Executed assigned development tasks and conducted shadowing sessions alongside senior engineers, building practical exposure to enterprise software delivery standards	

EDUCATION

Software Engineering	2026-Present
Universidad del Caribe	
Associate's Degree in Software Development	2022-2024
Instituto Tecnológico de las Américas	
Technical Baccalaureate in Computer Science	2017-2021
Instituto Politécnico Salesiano Hainamosa	

SKILLS

- Languages: JavaScript, TypeScript, Python, Node.js, HTML, CSS, C#
- Frameworks & Libraries: Next.js, Astro.js, React.js, Express, TailwindCSS, FastAPI
- Databases: SQL Server, MySQL, PostgreSQL, SQLite
- Development Tools: Git, GitHub, Postman
- Soft Skills: Problem-Solving, Teamwork, Adaptability, Critical Thinking, Effective Communication
- Languages (Human): Spanish (Native), English (B2 – Upper Intermediate)
